1. **Cart Icon/Button**: Include a prominent cart icon or button in the header or navigation menu to indicate the number of items currently in the cart. This provides easy access for users to view their cart contents.

2. **Cart Page Layout**:

   - Product List: Display all items added to the cart, including product images, names, quantities, prices, and subtotal for each item.

   - Quantity Adjustment: Allow users to easily adjust the quantity of each item in the cart, either by typing in a number or using increment/decrement buttons.

   - Remove Item: Include a button or icon next to each item to remove it from the cart.

   - Total Price: Show the total price of all items in the cart, including any applicable taxes or shipping fees.

- Continue Shopping: Provide a button or link to allow users to return to browsing products.

- Checkout Button: Include a prominent button to proceed to the checkout process.

3. **Cart Interactivity**:

- Update Cart: Automatically update the cart totals (subtotal, total price) when users change quantities or remove items.

4. **Checkout Process**:

- Seamless Transition: Ensure a seamless transition from the cart page to the checkout process, with clear instructions and minimal friction.

- Shipping Information: Prompt users to enter their shipping address and select a shipping method before proceeding to payment.

5. **Security and Trust**:

- Secure Connection: Ensure that the checkout process is conducted over a secure HTTPS connection to protect users' sensitive information.
